

The number-one priority at Clark Pest Control is protecting the world where our employees, customers, and you live, work, and play. We are going through difficult times right now, but we feel that difficult times also provide opportunities to help each other.

As a business deemed to be “essential” by the state of California, we are able to continue protecting people, property, and the food supply. We know that many people are “sheltering in place” right now, and we’d like to reach out to help some that are experiencing exterior pest issues while stuck at home.

That’s why we will be glad to help the first 100 families in Placer County that request a free exterior service.

This no-obligation service will be performed Monday, 3-30-20, and will include inspecting the property, sweeping down spider webs, treating eaves, and treating exterior harborage areas.

It’s in times like these that we like to remember to be good citizens and help out whenever possible. This is completely free and there is absolutely no obligation for future service.

We just want to help. Please call us at 530-823-6494 to schedule your free exterior service.
